Trans-Friendly Physician Referral List*

This list was compiled by FORGE and was last updated August 2007. Physicians on this list are included because one or more trans+ person has had positive healthcare experiences with them. FORGE does not endorse any particular health care provider, nor does FORGE imply that any of these care providers are medically knowledgeable in working with trans+/SOFFA individuals. FORGE's resource lists are, in part, driven by feedback we receive from consumers. Please share your experiences with us and/or make suggestions for additions to this list.

¹ Physicians who have a check mark in this box -- high volume of trans clients -- are known to see more than 10 transgender individuals in their practice.

² While other physicians on this list may follow the Harry Benjamin Standards of Care, the physicians who have a check mark in this box have a history of requiring a letter from a therapist before starting a new client on hormones.

³ Sliding scale rates are negotiated with the physician or health clinic. Some providers have very low sliding scales, while others may only give minimal discounts.
